

COMMERCIAL REBATE PROGRAMS

Energy Investments for Your Business

Powering The Center of What's Possible

As a Santa Clara business, you have access to many programs to help you save money and energy. Silicon Valley Power (SVP), your electric utility, supports your business through a full suite of rebate options, efficiency services and free on-site energy audits.

SMALL BUSINESS EFFICIENCY SERVICES

GET SPECIALIZED SUPPORT FOR YOUR NEEDS

SVP works with small businesses to manage energy efficiency projects and implement cost-saving measures in your facility. The SVP team acts as your agent, helping to prepare technical specifications, review competitive bids from qualified vendors, monitor construction and provide post-installation inspections.

HVAC AND ADVANCED ROOFTOP CONTROLS REBATES

STAY COOL WITH INCREASED EFFICIENCY

Ready to save on your heating and cooling costs? Replace your existing rooftop unit with a premium-efficiency unit or retrofit it with advanced controls to optimize performance, save energy and increase service life. SVP offers rebates for qualifying HVAC units and advanced rooftop controls.

LIGHTING REBATES

TURN ON SAVINGS WITH A FLICK OF A SWITCH

Upgrade your lighting systems with advanced LED technologies and networked lighting controls, which can reduce lighting costs by over 45%. SVP's Lighting Rebate Program provides rebates for energy-efficient lighting equipment and controls. SVP helps you select the best lighting options for your business, saving you time and money and enhancing workplace productivity and safety.

FOOD SERVICE EQUIPMENT REBATES

COOK UP MORE SAVINGS

Save on energy costs and receive rebates from SVP for purchasing ENERGY STAR® certified commercial food service equipment. Efficient refrigeration and electric cooking equipment such as ice machines, reach in coolers or freezers, ovens, griddles and fryers are eligible. Bonus incentives are also available for switching from natural gas to efficient electric equipment.

COMMERCIAL REBATE PROGRAMS

Energy Investments for Your Business

DATA CENTER PROGRAM

LARGE-SCALE EFFICIENCY DELIVERS SAVINGS

Data centers with IT server loads over 350 KW or IT cooling loads greater than 100 tons can qualify for rebates through SVP's Data Center Program. SVP will work with you to develop custom energy efficiency projects that translate into significant savings.

EMERGING TECHNOLOGY GRANT

GET FUNDING FOR NEW TECHNOLOGIES

Interested in installing an emerging energy efficient technology at your facility, but need funding? SVP offers grants up to \$250,000 to customers who implement new energy-efficient technology at their business. This grant can help you demonstrate new technologies that are not yet commercially viable or widely used but show potential for energy savings.

CUSTOMER DIRECTED REBATE

TAILOR ENERGY SAVINGS FOR YOUR BUSINESS

Considering an energy efficiency project that doesn't fit into an SVP rebate program? SVP's Customer Directed Rebate may help. Work with SVP to plan and implement a project that decreases electricity use at your facility and SVP may cover up to 65% of the project.

CONTROLS AND BUILDING OPTIMIZATION PROGRAMS

AUTOMATE YOUR BUILDING SYSTEMS

Automated control systems with advanced energy management capabilities save energy and improve the performance of air conditioning and lighting systems. SVP's Controls and Building Optimization programs offer rebates to customers who install a new energy-saving control system or optimize their existing system to save energy.

NEW CONSTRUCTION REBATES

IMPROVE YOUR BOTTOM LINE

Building or expanding your business facility in Santa Clara? Installing energy-efficient equipment can help you keep energy costs low, save on future maintenance, reduce pollution and improve workplace comfort. SVP offers rebates to buildings or systems that exceed Title 24 building energy efficiency standards by 10% or more.

CONTACT SVP TO GET STARTED

Pre-approval is required for all rebates. For more information and to ensure your energy efficiency project qualifies for rebates, contact SVP before you start planning or implementing any projects.
